

A little bit about our company:

Powder City was founded in June 2014 after Health Supplement Wholesalers dissolved. While our company is quite new, we're already making a splash in the industry by specializing in direct to consumer bulk powder supplements and nootropics. Based out of York, Pa, we manufacture, ship and fulfill orders in house. This allows us to have the most control over the product that ends up in your hands. We do third party testing on everything that comes through our warehouse, and personally test products for safety and effectiveness before selling them to consumers. We sample and test every bag, barrel, or box to ensure that all ingredients are of the highest quality possible. To say the least, we're enthusiasts who are committed to quality ingredients and we want to spread the ability to get cheap bulk supplements shipped right to your front door.
